Education

Shiv Nadar University — Noida
Bachelor of Technology (B.Tech) in Computer Science – ***GPA: 9.30*** — *Aug 2023 – May 2027*
Dean's List: Monsoon 2023, Spring 2024, Monsoon 2025

Resonance Junior College — Marredepally, Hyderabad
Class XII (PCM) – Grade: ***92.4%***

Delhi Public School — Nacharam, Hyderabad
Class X – Grade: ***91%***

Experience

Kyndryl | ***AI & Software Engineering Intern*** — *May 2026 – Present*

- Re-engineered the monitoring workflow for a **distributed** report generation system by redesigning execution pipelines, improving system observability and reliability in an **Agile** development environment
- Designed and implemented a **heartbeat-based health monitoring mechanism** for long-running report executions, reducing failure detection latency by over **93%** through automated failure detection
- Developed an **Agentic AI documentation assistant** that enables conversational access to enterprise knowledge, streamlining developer onboarding and technical support

Public Relations Lead, ACM Shiv Nadar Chapter — *May 2025 – May 2026*

- Led outreach and publicity campaigns for technical events, increasing student participation by **20%**

Projects

VidTube-AI | *Next.js, Node.js, Prisma, NeonDB, Cloudinary, Clerk, Vercel* | GitHub

- Built an **AI-powered SaaS** platform for uploading, managing, and transforming media using Cloudinary AI APIs
- Implemented intelligent media processing features including video compression, hover previews, and automatic image aspect ratio transformations
- Handled secure authentication with Clerk and optimized data management using Prisma with NeonDB (PostgreSQL)

BookNow | *Node.js, Express.js, MongoDB, EJS, Cloudinary, Mapbox, Render* | GitHub

- Engineered a full-stack property booking platform using **MVC architecture**, featuring listing search, dynamic filtering, user reviews, and complete CRUD operations
- Implemented authentication and authorization via **Passport.js** with server-side input validation using Joi schemas
- Integrated Cloudinary for cloud-based image management and Mapbox for interactive location visualization

SummarizerAI | *React.js, Python, PyTorch, Hugging Face Transformers, FastAPI* | GitHub

- Fine-tuned a **T5 Transformer model** on the **SAMSum** dialogue dataset to generate conversation summaries
- Built an end-to-end text summarization pipeline including preprocessing, tokenization, model training, and inference
- Developed a React frontend and FastAPI backend for real-time AI-powered text summarization

Skills

Languages:	Java, Python, JavaScript, C
Frontend:	React.js, Next.js, HTML, CSS, Tailwind CSS
Backend & APIs:	Node.js, Express.js, EJS, REST APIs, FastAPI
Databases:	MySQL, MongoDB
Developer Tools:	Git, GitHub, Postman, Vercel, Render
AI/ML:	PyTorch, Hugging Face Transformers, RAG, Scikit-learn, NumPy, Pandas, Matplotlib

Achievements

Top 15 – GoDaddy AI Buildathon — *Apr 2026*

- Built **HireLens AI**, an interview simulation platform that generates role-specific interview questions from resumes and job descriptions, provides AI-powered feedback, and evaluates candidate performance across multiple assessment metrics

Certifications

AWS Certified Cloud Practitioner, Google AI Essentials, The Complete Python Bootcamp
